

S.No	cyber security
Topic 3 :	<p>Command Shell Hacking</p> <p>(What is Operating System , Famous Operating System , Shell Programming, Basic Requirements for Shell , Fetch Computer Hardware, Fetch Computer Total Memory , Fetch Computer RAM Memory, Fetch Hard Disk Details , Command to get system information , Utility to get System Information , Bypass Windows Default execution & increase , Process priority , Installing Packages Using PowerShell , Powerful Copy Command , Fetch RAM Memory Details , Fetch RAM Memory HW Details , Fetch Driver Details , Free Format of Folder Listing , Get list of Tasks Running in Computer , Get list of Services Running in Computer , Delete Files using PowerShell , Delete Folders using PowerShell , Find User Last Login Details , Restart Computer using PowerShell)</p>
Topic 4 :	<p>System Hacking</p> <p>(How to find IP Address of a Computer , How to find IP Address of a Website</p> <p>Calculate How much data transferred in a network , How to find the path of accessing the website , Find IPV4 and IPV6 details of the Website Server ? , Find Wifi Status , Find Wifi Security Info Find Wifi Password , Get the MAC Address from IP Address , Flush the Network Connection , Tool to find the Website Owner Details , Tool to Check Website is Alive or not , Tool to Check Computer Information's heart beat , Tool to Check Processes individually , Check for Windows For errors ,Making Password Never Expires , Find the Security ID of the User , Access Control Panel as a Specific User , Tool to Fetch Complete PC Information , Find the Security ID of the User , Access task Manager information from Tools , Tool to find Users Logged in to the System , Hack Administrator Account , Hack Windows Bypassing using USB , Hack Windows By confusing , Virus Check Software , Memory Hijack Software , USB injection Software Driver Check Software , Browser Clean Software , What is Volume Licensed MS products , Ccleaner – memory cleanup , Malware Threats , Viruses Hacking , Resident Virus , Direct Action , Boot Sector , Multi Partite , Polymorphic , Overwrite , Space Filler Virus , System Hacking Types , Viral Scripting , Hardware Hacking)</p>
Topic 5 :	<p>File Server Hacking</p> <p>(Anatomy of a FTP Server , How File Transfer Protocol ? , How to move Files to Live Server , Use Specified Authentication to load the Files into Live Server , Check for the port to move data , Using Anonymous Authentication is not secure, Open FTP with Server Name , Anatomy of a FTP IP Address , Open FTP with IP Address , Secure FTP server from Hacking , HTAccess or Any config files , Mobile Memory Access Via FTP Concept)</p>
Topic 6 :	<p>Web Server Hacking</p> <p>(What is Root Name Server , How website works ? , How website works ? , How DNS Works , How Dig Tools Works , Server Info Extraction Tool – Part 1 , Server Info Extraction Tool – Part 2 – DNSKEY , Server Info Extraction Tool – Part 2 – DS Record , Anatomy of a Website , How Internet Works , How Website Works , NSLookup Networking Command , Diggint Tool , How to make a Server ? , Server into a Web Server ? , Web Server to World Wide Web Registered Server)</p>
Topic 7 :	<p>Website Hacking</p> <p>(Information Gathering – FootPrinting , DNS Enumeration , DNS Info Extraction , What is DNS , What is Reverse DNS , Chrome Extension , IP Information of the Website , SPF Record Details , Web Server Information , Website Owner Information , Termux ReconDog , Install Python&GIT , Port Scanning , Who is Lookup , Who is Lookup with software , Who is Lookup with websites , Port Scanning , Honey Pot Server , Reverse IP Lookup , Reverse IP Lookup with websites , Censys – Website Monitor tool , What is Web Session ? , What is Session Hijacking ? , Tor Browsers , Anonymizers , Type of Anonymizers , Anonymizers – Bypass Web Filters , Anonymizers – Bypass Internet Traffic , What is Phishing , Phishing Prevention , What is IP Spoofing , How IP Spoofing works ? , IP Spoofing Basics – How it works ? , IP Spoofing types , IP Spoofing Types – Non-Blind Spoofing , IP Spoofing Types – Blind Spoofing , IP Spoofing Types – Smurf Attack , IP Spoofing Types – MITM Attack , IP Spoofing with Software's , IP Spoofing with Websites , What is MAC Spoofing , Remote Access VPN , How VPN protocol works ? , VPN Data Encryption , PC VPN Settings , Mobile VPN Settings , IP Spoofing with VPN , How to get Current Ip address ? , Secret mobile Settings for VPN configuration , VPN network configuration with new IP , What is VPN , What is Firewall – Technical Info , IP Spoofing Prevention Technique , Additional Features of Firewall , Firewall Types , Host Based Firewall , How Router works ? , Network Based Firewall , What is Cloaking in Hacking)</p>

Topic 8 :	<p>Mobile Hacking</p> <p>(Find mobile number details , Access Mobile Number information , Basic Phone Info Package , Install Termux , Access Memory using Termux , Hacking Mobile Task Manager , Networking Cmds in Termux , Ping Command in Termux , Botting Websites , What is an Internet Bot ? , What is a Website Bot ? , What is a BotNet ? , How Hackers attack Website – DOS Attack , How DDOS works , Charter – AntiBot Scanner , Microsoft Safety Scanner , Website Directory Extraction , What is Web Server , Vulnerability testing , Website Vulnerability Analysis)</p>
Topic 9 :	<p>Penetration Testing</p> <p>(MetaSploit – PenTest Tool , What is MetaSploit , MetaSploit History , MetaSploit Packages , MetaSploit Modules , MetaSploit Sub Modules , How MetaSploit works with Pen Testing , How Exploits works in Metasploit ? , Metasploit Architecture , Metasploit Library , Metasploit Codes , Metasploit Tools , Metasploit Command Basics , Modules in Metasploit , Create and Setup Exploit, Attack Target , Fetch the injected Virus Path , Make Directory to Control Target , Injecting Files in to the Target Machine , Idle time and IP Details of the Target , Keyboard Hacking/Password Attacks , Audio Recording , Hacking Screenshot of Target , Hacking Screen of the Target , Hack Camera Details in the Target , Hack Camera Take snap of the Target , Hack Camera Take Live Video of the Target , How to install Metasploit in Mobile , How to search Metasploit packages , Find open ports using Metasploit in target)</p>
Topic 10 :	<p>Social Network Hacking</p> <p>(find fb id , Find facebook friends using termux – Facebook Tricks)</p>
Topic 11 :	<p>Email Hacking</p> <p>(Email Spoofing , Mail Tracking with gmail , Send mail to find location)</p>
Topic 12 :	<p>Wifi Hacking</p> <p>(Wifi Introduction – Basic components of Wifi , How Wifi works , Wireless Devices, Get Basic Wifi Accounts Stored in the Computer , Get Wifi interfaces Stored in the Computer , Get Wifi Properties Stored in the Computer , How to Export Wifi Passwords , How to get Windows Wifi Password)</p>
Topic 13 :	<p>Kali Linux – Hacking Operating System</p> <p>(Introduction , FootPrinting Tools, Backdoor Attack Tools , Reconnaissance Tools , Sniffing Tools)</p>
Topic 14 :	<p>Parrot OS – Hacking Operating System</p> <p>(Anonymous Access – Be a Hacker , No one can hack you , Control your network usage , Control your computer Execution , Control anyone in the Network)</p>
